

SCIENCE-BACKED FORMULATIONS

Clinically guided, premium ingredients

Purpose

Lathell formulations are developed using evidence-based nutritional science and clinically guided ingredient selection to ensure functional performance and regulatory compatibility.

What This Means

Products are:

- Designed with known bioactive compounds
- Built around safety and efficacy profiles
- Structured for institutional use
- Supported by formulation documentation

Strategic Value

This ensures:

- High trust by regulators
- Acceptance by hospitals and institutions
- Differentiation from generic supplements
- Policy compatibility

Partner Responsibilities

- Follow approved formulation standards
- Avoid unauthorized modifications
- Use official product documentation
- Maintain scientific integrity

Instruction for Officials
